

Biographies

Ricardo Bitran is a senior health economist from Chile with over 30 years of experience as a policy advisor, researcher, and professor in Chile, the US, and over 40 developing countries, including nearly all countries in Latin America and the Caribbean. He holds an M.S. in Industrial Engineering from the University of Chile and an MBA in Finance and a Ph.D. in Health Economics from Boston University. He specializes in the development and evaluation of health sector financing reforms and in public and private health investment projects. He is president and founding partner of Bitran y Asociados, an international consulting firm based in Santiago, specializing in health policy. Previously he worked for 10 years at Abt Associates Inc. in Cambridge, Massachusetts, first as Health Economist and then as Senior Scientist.

Thomas J. Bossert, Ph.D., is the Director of the International Health Systems Program in the Department of Global Health and Population at the Harvard School of Public Health. He has many years of experience in international development in Latin America and the Caribbean, Africa, Asia and Central and Eastern Europe. His specialties include policy analysis, organizational and institutional analysis, decentralization, human resources strategy, public/private relations, community development, regulation, and project design and evaluation. His responsibilities have included providing technical assistance, conducting research, and project management for contracts with various donors including USAID, DFID, World Bank, Interamerican Development Bank, World Health Organization. Dr. Bossert earned his Ph.D. in political science from the University of Wisconsin, Madison and his A.B. from the Woodrow Wilson School at Princeton University. He is fluent in Spanish and has a working knowledge of French. Dr. Bossert has taught as an assistant professor of political science at Dartmouth College, Swarthmore College, McGill University, Sarah Lawrence College, the University of Wisconsin and Harvard School of Public Health. He has also held research positions at Harvard School of Public Health, Dartmouth College Medical School, and the Land Tenure Center, University of Wisconsin.

Ursula Giedion studied economics at the University of Geneva, Switzerland and holds a Masters of Economics from the National University of Colombia. She has been a health researcher for Fedesarrollo, a consultant for Harvard University's Project on Health Sector Reform in Colombia, Chief Economist at Bitrán & Associates, and a consultant and investigator for The Brookings Institution, the Inter-American Development Bank, and the World Bank. Currently, she serves as Senior Consultant, Director Regional Network on Benefits Package and Priority Setting, Inter-American Development Bank. She has published numerous articles and book chapters, the most recent of which focus on design, setting and implementation of benefits plans in Colombia and Mexico and the impact of insurance on access, financial security and health. Her research and consultations are centered on themes of health financing, evaluation of public policies on health, and the design and implementation of explicit benefits plans.

Amanda Glassman is the director of global health policy and a senior fellow at the Center for Global Development, leading work on priority-setting, resource allocation and value for money in global health, with a particular interest in vaccination. She

has 20 years of experience working on health and social protection policy and programs in Latin America and elsewhere in the developing world. Prior to her current position, Glassman was principal technical lead for health at the Inter-American Development Bank, where she led health economics and financing knowledge products and policy dialogue with member countries, designed the results-based grant program Salud Mesoamerica 2015 and served as team leader for conditional cash transfer programs such as Mexico's Oportunidades and Colombia's Familias en Accion. From 2005-2007, Glassman was deputy director of the Global Health Financing Initiative at Brookings and carried out policy research on aid effectiveness and domestic financing issues in the health sector in low-income countries. Before joining the Brookings Institution, Glassman designed, supervised and evaluated health and social protection loans at the Inter-American Development Bank and worked as a Population Reference Bureau Fellow at the US Agency for International Development. Glassman holds a MSc from the Harvard School of Public Health and a BA from Brown University, has published on a wide range of health and social protection finance and policy topics and is editor and co-author of the books *From Few to Many: A Decade of Health Insurance Expansion in Colombia* (IDB and Brookings 2010) and *The Health of Women in Latin America and the Caribbean* (World Bank 2001). For more on Amanda including access to her publications, see <http://www.cgdev.org/expert/amanda-glassman>.

Alexandra Hulme, MPH is an Analyst/Technical Project Officer for HFG's LAC Bureau, Governance, Ethiopia, and Angola activities. Alex performs a variety of management and technical coordination functions for her HFG activities, and her technical focus is in qualitative research and analysis, quality improvement processes and health system strengthening. She has experience in designing and conducting qualitative research, conducting data collection and training in English and Spanish and managing and implementing MCH and HIV/AIDS focused projects. She received a BA in International Relations and Spanish from Bucknell University and her MPH in International Health from the Boston University School of Public Health. She has experience working in Chile, Mozambique, Dominican Republic, Ethiopia and Zambia and speaks fluent Spanish.

Dr. Ann Lion, Project Director, leads the Health Finance and Governance (HFG) Project team. Dr. Lion sets HFG's strategic direction, establishes the technical vision and implementation priorities, provides technical and managerial support, maintains an effective partnership with USAID, and holds ultimate responsibility for project performance, compliance, and results. With more than 30 years of experience, Dr. Lion is internationally recognized as an outstanding leader of global, regional, and country-level health projects. Prior to HFG, she served as Project Director for the Abt-led Health Systems 20/20 project, which concluded in September 2012 (Abt).

Jordan Tuchman, MPH, is a program manager, technical advisor, and researcher with more than 12 years of experience managing, implementing, and evaluating health and related projects in Asia, Africa, and Latin America. Mr. Tuchman works in the areas of Health, Social Welfare (SW), and Community Systems Strengthening, focusing on the role of systems strengthening in enhancing quality services provision. His technical expertise lies primarily in Information Systems, Human

Resources, and Monitoring & Evaluation. His field work spans 15 countries, including long-term assignments in Guatemala, India, Nepal, and Vietnam, including as a Peace Corps volunteer in Guatemala. He holds an MPH from Boston University and speaks fluent Spanish.

Veronica Valdivieso is the deputy health team leader for USAID's Latin America and Caribbean Bureau, where she oversees regional programs on health systems strengthening, maternal and child health, family planning, and nutrition. She has experience assisting missions with a variety of issues, including designing, evaluating, and documenting health and nutrition programs; developing strategy papers and transition plans; and preparing government-to-government agreements and relevant performance milestones. She has worked on health policy and governance issues in the U.S. and abroad for more than ten years. Her broad experience includes advising a U.S. Senator during the recent health reform effort and two appropriations cycles; evaluating the District of Columbia's response to HIV/AIDS; drafting legislation and advocating for mental health reform in Sri Lanka as a consultant for the World Health Organization; and assisting pharmaceutical companies, universities, and hospitals with legislative, compliance, and regulatory issues relating to health care and bioethics as a health lawyer in private practice at a major law firm. Veronica received her J.D. from Georgetown University Law Center and her M.P.H. with a certificate in Finance and Management from The Johns Hopkins University Bloomberg School of Public Health, as well as her A.B. in Molecular Biology with a certificate in Latin American Studies from Princeton University.

Kelsey Vaughan, M.Sc., MPP, is a health economist and health policy specialist who has worked in government, universities, research institutions and private consultancies in Europe, Latin America and the United States. She has provided technical assistance on health systems issues to various governments, Bill & Melinda Gates Foundation, UN agencies, WHO, World Bank and private companies. Ms Vaughan has led and performed a variety of studies in the field of health economics including costing, cost-effectiveness and value for money studies in Democratic Republic of Congo, Ethiopia, Guatemala, Indonesia, Malawi, Namibia, Nepal, the Netherlands, Nigeria, Tanzania and Zimbabwe. Most recently she completed a cost-effectiveness assessment of a community-based prevention and rehabilitation program in Nepal and led the costing of the basic benefits package proposed for Zimbabwe. She teaches regularly at the Royal Tropical Institute (KIT) in Amsterdam, including the health economics segments of KIT's Master in International Health (MIH/ICHD) and Netherlands Course in Tropical Medicine and Hygiene (NTC). She speaks fluent Spanish.
